WebEx Meeting Manager

The WebEx meeting service automatically downloads, installs and configures Meeting Manager (approx. 1MB), the first time you start or join a meeting. However, some locked-down systems restrict this automated setup, so you may need to download and run the Meeting Manager installer for your particular platform below. The installer is useful only if your system does not allow you to automatically install software directly from a Web site.

Before you set up Meeting Manager, you should [test your system](#) to see if it meets the minimum system requirements for running a WebEx meeting.

MEETING MANAGER INSTALLERS:

[DOWNLOAD](#) InstallShield for Windows

[DOWNLOAD](#) Installer for Mac OS X

*The Meeting Manager for Linux and Solaris is automatically downloaded, installed and configured the first time you start or join a meeting. No manual installers.
