SELECT, ANALYZE, and SORT Fields

The SELECT command is used to create E-numbers containing terms taken from the specified field in an answer set.

The ANALYZE command is used to create an L-number containing terms taken from the specified field in an answer set.

The SORT command is used to rearrange the search results in either alphabetic or numeric order of the specified field(s).

 AB The publication, 1997 Facts and Figures of the US Plastics Industry, provides an authoritative statistical report on major thermoset and thermoplastic resins. The annually updated report contains detailed tables on resin production, sales and captive use, capacity and utilization rate data from 1986-1996, and domestic consumption by end-use and distribution by major market from 1992-1996. Data on total US production and sales and captive use from 1971-1996 are also included. The publication features data on major markets, shipments of fabricated plastics products, machinery sales and shipments, plastics additives and processes, a glossary of plastics terms, and a list of additional sources of plastics information such as business and consulting groups, government organizations, and industry trade publications. The 130-page report (publication BA-154) is available from the Society of the Plastics Industry Literature Sales, PO Box 753, Waldorf, Maryland 20604, USA; tel (800)541-0736 (credit card orders only); outside US call (202)974-5332; \$95 (SPI members) plus \$8 postage and handling; \$190 (nonmembers) plus \$10 postage and handling.
